Whereas we in Vermont are experiencing many effects of climate change; And whereas the state of Vermont has a goal of sourcing 90 percent of it's energy from renewable sources by 2050 but is making insufficient progress;

We, the town of Greensboro, direct the state to:
 Refrain from funding fossil fuel infrastructure; Commit to firm deadlines for the transition from fossil fuels to renewables; Commit to an economically fair transition for all Vermonters; Incentivize residential and agricultural scale renewable projects; Ensure that the energy of large solar or wind projects benefit local populations and result in short transmission lines; Ensure that large scale wind and solar are vetted by Act 250.
 And we, the town of Greensboro agree to commit to doing our part by:
 Protecting town land from fossil fuel infrastructure; Weatherizing our town buildings; Enlisting help to get solar on town owned roof tops; Other projects to help combat climate change and improve our residents' lives.
