Greensboro Town Recycling Committee

Attendees:

Judy Carpenter
Christine Armstrong
Ken Johnston
Stew Arnold

Ken Johnston reported on communication with Lamoille District. Question - Would they take us? They would have to vote to include us. It seemed that we would have to present a compelling reason. There is history of them turning down others. So, our likelihood is slim.

Our next step as committee - present summary of our research and possible options to the select board:

Purpose- originally formed to address a building need required by NEKWMD. This need has gone away yet we continued to meet to research and present best possible options.

Findings- our volume has remained consistent over past 8 years. Our current system is working with cost to town increasing slowly over past few years.

Research- we reviewed about 20 other towns in our area to determine plus and minus - single sort vs multi sort; benefits vs drawbacks of other districts; costs to user and/or town.

Our options:

1. Stay as we are. No immediate change is required.
2. Stay where we are yet change fee structure. Collect surcharge on trash collection to offset costs to town.
3. Stay where we are yet improve storage. Replace shipping containers or enhance with roof.
4. Build a new collection center. New location.

Select Board meeting is Weds, May 10th 6:30pm
