Re: 94 Lazy Lane, Greensboro, VT

Dear Liz,

Today I met with Shannon Morrison of the VT Wetlands Program. Shannon confirmed my wetland delineation; and she classified the southern wetland as Class 2, and the northern wetland as Class 3. As you know the Class 2 wetland and a 50-foot buffer zone are protected by the State of VT Wetland Rules. The Class 3 wetland is not protected by the state. Let me know if you determine that you need a wetland permit for the septic replacement, and I would be glad to help. Thanks!

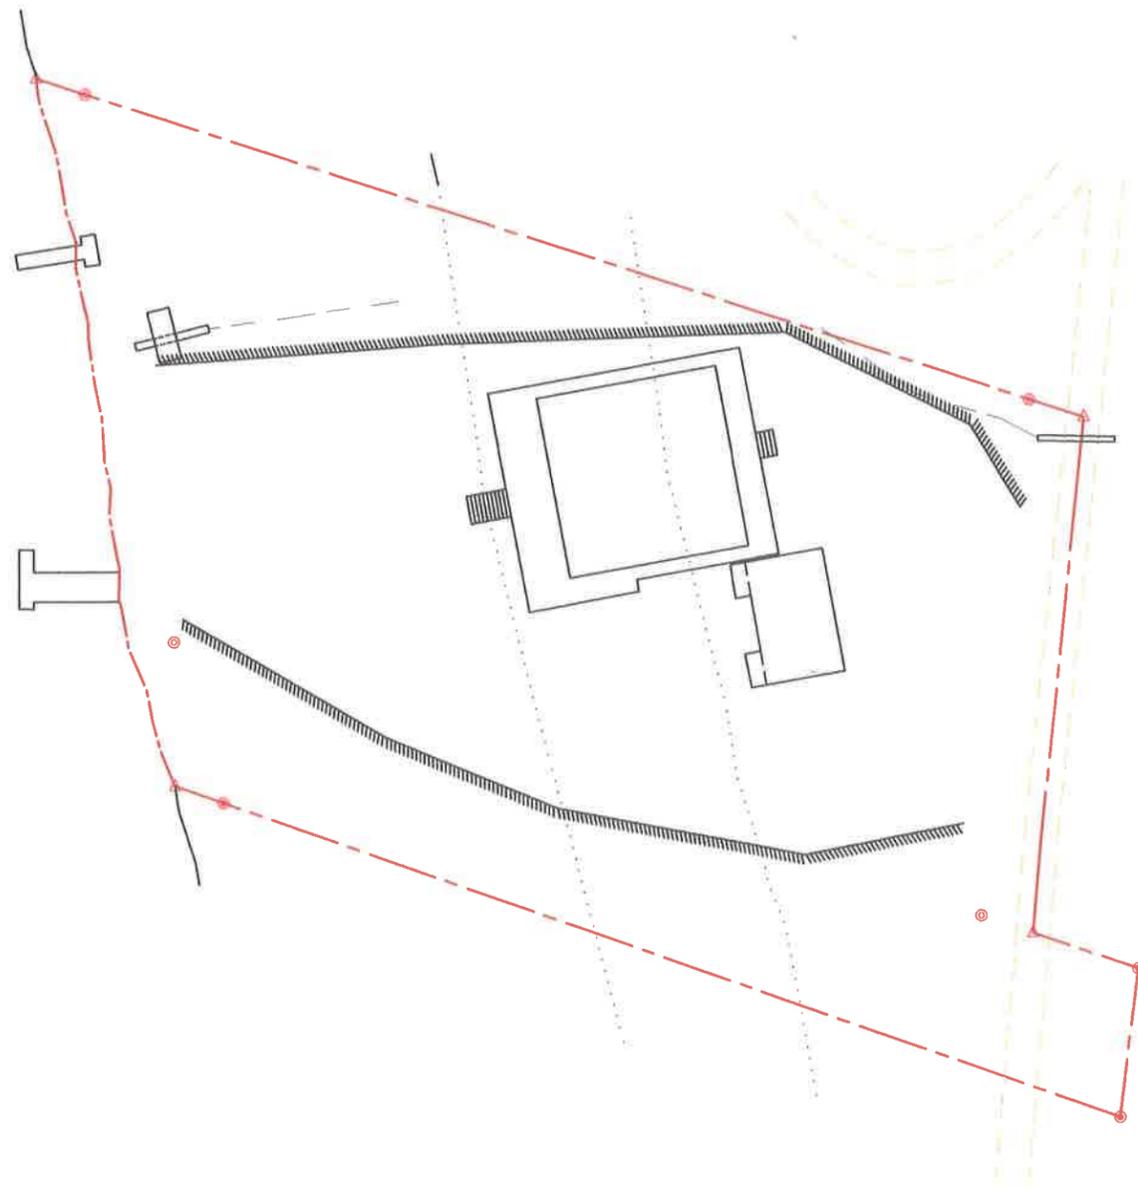

Sincerely,

A handwritten signature in black ink, appearing to read "KIR".
