Buffer Restoration Proposal

November 3, 2020

Project: Howes Residence
Greensboro, VT

Eveningside Landscape Mitigation Plant List

Low native plants: Use 2-3 varieties of ferns spacing 18-24" on center to act as a vegetative ground cover

- Polystichum acrostichoides (Christmas Fern)
- Athyrium filix-femina (Lady Fern)
- Dennstaedtia punctiloba (Hay Scented Fern)

Shrubs: Implemented to fill in voids between the ground cover and trees. Spacing 3-4’ on center.

- Silky and Red Twig Dogwoods- compact varieties such as Artic Fire
- Myrica gale (Sweet Gale)

Trees: Planted in groupings or clusters to mimic the natural growth habit of the existing area

- Thuja occidentalis (White Cedars)
- Betula alleghaniensis (Yellow Birch)
- Betula papyrifera (White Birch)

The quantities should be determined on site depending on existing vegetation.
